

Grades: Quintile rankings of asset classes
 Downgrade Upgrade No Change

Trend: 12-month momentum
Carry: Current yield / current std. deviation

Risk: Based on 60-day std. deviation

U.S. Treasurys

Yield: 2.19%

Risk: 2.73%

TREND CARRY
F F

Treasurys may be the purest way to express an interest rate position. As a result, this asset class represents the tip of the spear on the future of interest rates. If you must hold Treasurys, we believe short duration/cash-like or muni bonds are best.

U.S. Investment Grade Credit

Yield: 3.19%

Risk: 3.08%

TREND CARRY
C D

There has been an uptick in buying of investment-grade credit; however, the strong economy still favors more credit risk, so we prefer high-yield over investment-grade.

Municipal Bonds

Yield: 2.36%

Risk: 2.56%

TREND CARRY
D D

Muni bonds offer an attractive yield relative Treasurys. However, the low likelihood of recession favors taking more credit risk. Look to high-yield municipal bonds instead. If you must have a high-safety asset class, we think this asset class is a good bet over Treasurys.

High-Yield Municipal Bonds

Yield: 5.14%

Risk: 3.36%

TREND CARRY
B C

This asset class is riskier than rated muni bonds, but barring a recession (which seems unlikely at this juncture), we believe high-yield municipal bonds are a good alternative to any investment-grade holding. If you are looking for safe cash flow, we think this asset class is likely the best opportunity.

U.S. High-Yield Corporate Bonds

Yield: 5.72%

Risk: 1.89%

TREND CARRY
C B

The spread on high-yield is very tight and investors have a right to be cautious. This asset class is still a good source for current income given the strength of the economy, but if you have to choose, EM corporate debt appears stronger.

Emerging Market Corporate Debt

Yield: 5.92%

Risk: 1.50%

TREND CARRY
B A

If you absolutely need government bonds, we see this as your best bet. However, spreads are now at pre-crisis levels and the great returns from this asset class might not warrant the risk. Again, we'd suggest credit over sovereign bonds.

Emerging Market Sovereign Debt

Yield: 4.90%

Risk: 2.84%

TREND CARRY
A B

This asset class has been a great performer, but has volatility similar to stocks and a yield that offers very little cover in the case of rising interest rates, which have been going up. A pullback in currency values could lead to a very sharp decline, such as the near 4% drawdown in September.

International Sovereign Debt

Yield: 0.71%

Risk: 5.11%

TREND CARRY
A F

This asset class has been a great performer this year, but its volatility is similar to stocks and it has a yield that offers very little cover in the case of rising interest rates, which have been going up. A pullback in currency values could lead to a very sharp decline, such as the near 4% drawdown in September.

Mortgages

Yield: 2.91%

Risk: 1.87%

TREND CARRY
D C

Mortgages continue to struggle in a rising rate environment. We have seen a downgrade in trend as the course of interest rate increases becomes more visible. Due to this macro trend, mortgages most likely do not belong in an income portfolio.

Short Term Treasurys (Cash Proxy)

Yield: 1.89 %

Risk: 0.54%

TREND CARRY
F A

Right now we would prefer credit risk over short duration, but in the event of recessionary environment, cash is starting to look very attractive.

Definition of Terms

Alerian MLP Infrastructure Index is the leading gauge of large- and mid-cap energy master limited partnerships (MLPs). The float-adjusted, capitalization-weighted index includes some of the most prominent companies and captures approximately 75% of available market capitalization.

Bloomberg Barclays EM Sovereign Bond Index is a rules-based market-value weighted index engineered to measure the fixed-rate local currency sovereign bonds issued in emerging markets as identified by Bloomberg.

Bloomberg Barclays Global Treasury ex-USD Index is an unmanaged index composed of those securities included in the Barclays Global Aggregate Bond Index that are Treasury securities, with the US excluded while hedging the currency back to the US dollar.

Bloomberg Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable and dollar denominated. The index covers the U.S. investment-grade, fixed-rate bond market, with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities.

Bloomberg Barclays U.S. Corporate High-Yield Bond Index covers the USD-denominated, noninvestment-grade, fixed-rate, taxable corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below.

Bloomberg Barclays U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are rated investment grade (Baa3/BBB) or higher.

Bloomberg Barclays U.S. Mortgage Backed Securities (MBS) Index tracks the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA) and Freddie Mac (FHLMC).

Bloomberg Barclays U.S. Municipal Bond Index covers the USD-denominated, long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and pre-refunded bonds.

Bloomberg Barclays U.S. Municipal High Yield Index measures the noninvestment-grade and nonrated U.S. dollar-denominated, fixed-rate, tax-exempt bond market within the 50 United States and four other qualifying regions (Washington D.C., Puerto Rico, Guam and the Virgin Islands).

Bloomberg Barclays U.S. Treasury Index is an unmanaged index of public obligations of the U.S. Treasury with a remaining maturity of one year or more.

Bloomberg Barclays U.S. Treasury Bond 1-3 Year Term Index is an unmanaged index of public obligations of the U.S. Treasury includes public obligations of the U.S. Treasury with a maturity between 1 and up to (but not including) 3 years.

BofA Merrill Lynch U.S. Core Fixed Rate Preferred Stock Index consists of investment-grade, fixed and fixed-to-floating rate U.S. dollar-denominated preferred securities.

CBOE Volatility Index is a popular measure of market risk and is constructed using the implied volatility of S&P 500 index options.

Consumer price index (CPI) is an index number measuring the average price of consumer goods and services purchased by households. The percentage change in the CPI is a measure of inflation.

Credit Suisse Emerging Market Corporate Bond Index consists of U.S. dollar-denominated fixed-income issues from Latin America, Eastern Europe and Asia.

Dow Jones Global ex-U.S. Select REIT Index measures the performance of equity real estate investment trusts (REITs) and real estate operating companies (REOCs) traded globally, excluding the U.S.

Dow Jones U.S. Real Estate Index measures the performance of the real estate industry of the U.S. equity market.

JPMorgan Global Manufacturing Purchasing Managers' Index is a composite index that serves as a global economic indicator by measuring different business conditions in 24 countries, including global manufacturing output, new orders and employment across the global manufacturing sector.

MSCI EAFE (Europe, Australasia and Far East) Index is a stock market index that is designed to measure the equity market performance of developed markets outside of the U.S. and Canada.

MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

MSCI Emerging Markets Infrastructure Index captures the global opportunity set of companies that are owners or operators of infrastructure assets.

MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

MSCI Emerging Markets Infrastructure Index captures the global opportunity set of companies that are owners or operators of infrastructure assets.

MSCI World Index is a free float-adjusted market capitalization index designed to measure equity market performance in the global developed markets.

Max drawdown is the percentage of loss that an asset incurs from its peak net asset value to its lowest value.

NASDAQ-100 is a modified capitalization-weighted index that includes the largest nonfinancial U.S. and non-U.S. companies listed on the NASDAQ stock market across a variety of industries, such as retail, healthcare, telecommunications, wholesale trade, biotechnology and technology.

NYSE Advance/Decline Indicator is a technical indicator that charts the difference between the number of advancing stocks and declining stocks on the NYSE in a given market on a given day.

NYSE New High/Lows is a technical indicator that charts the highest and lowest prices over 52 weeks of NYSE stocks in a given market on a given day.

Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index. The Russell 3000 Index represents approximately 98% of the investable U.S. equity market.
