

Grades: Quintile rankings of asset classes
 Downgrade Upgrade No Change

Trend: 12-month momentum
Carry: Current yield / current std. deviation

Risk: Based on 60-day std. deviation

U.S. Stocks

Yield: 1.80%

Risk: 7.41%

TREND CARRY
B D

U.S. stocks continue to outperform, eroding the income we are looking for. U.S. stocks remain one of the worst absolute level of income in our stock universe. We see U.S. stocks as a solid total return option and can be used as a good hedge against inflation and rising rates with continued regulatory changes.

International Stocks

Yield: 2.98%

Risk: 7.23%

TREND CARRY
A B

Developed foreign markets have benefitted greatly by the slowdown in bond purchases by the European Central Bank and Bank of Japan. Additionally, the U.S. dollar has seen a further decline relative to the euro and yen, significantly benefitting this asset class. Caution might be in order as the U.S. dollar is extremely oversold.

Emerging Market Stocks

Yield: 2.17%

Risk: 11.31%

TREND CARRY
A F

Emerging market stocks still produce low income, but the asset class offers strong diversification away from the U.S. economic environment. The strong trend, valuation and possible change in the long-term cycle all favor this asset class.

U.S. Real Estate

Yield: 4.15%

Risk: 11.33%

TREND CARRY
D C

The positive correlation with bonds should be taken seriously, especially for any investor with a large position in fixed-rate bonds. This holding is probably a good speculative position on the basis of a rebound off the recent lows, but not a good long-term core position for now.

Master Limited Partnerships (MLPs)

Yield: 7.30%

Risk: 20.04%

TREND CARRY
F C

Volatility has declined somewhat, which could present a buying opportunity. Keep an eye on further declines in risk.

Preferred Stocks

Yield: 5.57%

Risk: 3.30%

TREND CARRY
D A

We see preferred stocks as the asset class to own for safe U.S.-based income. The asset class does have a positive correlation to bonds, but the higher income stream should help protect it from changes in rates. The recent resurgence in bank stocks could find its way to preferred stocks in the near term.

Utilities

Yield: 3.56%

Risk: 12.15%

TREND CARRY
C D

Like real estate, utilities sold off as investors weighed the impact from rising rates. January saw the largest rise in the 10-year Treasury note since November 2016. An upward monthly move that large has only happened eight times in the last 10 years. The earning multiples of this space and long-term growth prospects are fairly weak signals. We believe investors should look at preferred stocks instead of utilities.

International Real Estate

Yield: 3.91%

Risk: 7.33%

TREND CARRY
C A

Volatility has been declining in international real estate and the carry is looking very attractive at this point. The asset class has also lagged other international assets, so there should be some relative value that could provide some capital appreciation as well.

EM Infrastructure

Yield: 3.49%

Risk: 8.20%

TREND CARRY
B B

The most recent volatility in EM stocks has highlighted the attractiveness of this asset class. Emerging market infrastructure provides a great way to access emerging markets with decent income and reduced volatility compared to broad EM stocks.

Definition of Terms

Alerian MLP Infrastructure Index is the leading gauge of large- and mid-cap energy master limited partnerships (MLPs). The float-adjusted, capitalization-weighted index includes some of the most prominent companies and captures approximately 75% of available market capitalization.

Bloomberg Barclays EM Sovereign Bond Index is a rules-based market-value weighted index engineered to measure the fixed-rate local currency sovereign bonds issued in emerging markets as identified by Bloomberg.

Bloomberg Barclays Global Treasury ex-USD Index is an unmanaged index composed of those securities included in the Barclays Global Aggregate Bond Index that are Treasury securities, with the US excluded while hedging the currency back to the US dollar.

Bloomberg Barclays U.S. Aggregate Bond Index represents securities that are U.S. domestic, taxable and dollar denominated. The index covers the U.S. investment-grade, fixed-rate bond market, with index components for government and corporate securities, mortgage pass-through securities and asset-backed securities.

Bloomberg Barclays U.S. Corporate High-Yield Bond Index covers the USD-denominated, noninvestment-grade, fixed-rate, taxable corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below.

Bloomberg Barclays U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are rated investment grade (Baa3/BBB) or higher.

Bloomberg Barclays U.S. Mortgage Backed Securities (MBS) Index tracks the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA) and Freddie Mac (FHLMC).

Bloomberg Barclays U.S. Municipal Bond Index covers the USD-denominated, long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and pre-refunded bonds.

Bloomberg Barclays U.S. Municipal High Yield Index measures the noninvestment-grade and nonrated U.S. dollar-denominated, fixed-rate, tax-exempt bond market within the 50 United States and four other qualifying regions (Washington D.C., Puerto Rico, Guam and the Virgin Islands).

Bloomberg Barclays U.S. Treasury Index is an unmanaged index of public obligations of the U.S. Treasury with a remaining maturity of one year or more.

Bloomberg Barclays U.S. Treasury Bond 1-3 Year Term Index is an unmanaged index of public obligations of the U.S. Treasury includes public obligations of the U.S. Treasury with a maturity between 1 and up to (but not including) 3 years.

BofA Merrill Lynch U.S. Core Fixed Rate Preferred Stock Index consists of investment-grade, fixed and fixed-to-floating rate U.S. dollar-denominated preferred securities.

CBOE Volatility Index is a popular measure of market risk and is constructed using the implied volatility of S&P 500 index options.

Consumer price index (CPI) is an index number measuring the average price of consumer goods and services purchased by households. The percentage change in the CPI is a measure of inflation.

Credit Suisse Emerging Market Corporate Bond Index consists of U.S. dollar-denominated fixed-income issues from Latin America, Eastern Europe and Asia.

Dow Jones Global ex-U.S. Select REIT Index measures the performance of equity real estate investment trusts (REITs) and real estate operating companies (REOCs) traded globally, excluding the U.S.

Dow Jones Industrial Average (DJIA) is a price-weighted average of 30 blue-chip stocks that are generally the leaders in their industry and are listed on the New York Stock Exchange.

Dow Jones U.S. Real Estate Index measures the performance of the real estate industry of the U.S. equity market.

JPMorgan Global Manufacturing Purchasing Managers' Index is a composite index that serves as a global economic indicator by measuring different business conditions in 24 countries, including global manufacturing output, new orders and employment across the global manufacturing sector.

MSCI EAFE (Europe, Australasia and Far East) Index is a stock market index that is designed to measure the equity market performance of developed markets outside of the U.S. and Canada.

MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

MSCI Emerging Markets Infrastructure Index captures the global opportunity set of companies that are owners or operators of infrastructure assets.

MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

MSCI Emerging Markets Infrastructure Index captures the global opportunity set of companies that are owners or operators of infrastructure assets.

MSCI World Index is a free float-adjusted market capitalization index designed to measure equity market performance in the global developed markets.

Max drawdown is the percentage of loss that an asset incurs from its peak net asset value to its lowest value.

NASDAQ-100 is a modified capitalization-weighted index that includes the largest nonfinancial U.S. and non-U.S. companies listed on the NASDAQ stock market across a variety of industries, such as retail, healthcare, telecommunications, wholesale trade, biotechnology and technology.

NYSE Advance/Decline Indicator is a technical indicator that charts the difference between the number of advancing stocks and declining stocks on the NYSE in a given market on a given day.

NYSE New High/Lows is a technical indicator that charts the highest and lowest prices over 52 weeks of NYSE stocks in a given market on a given day.
